SUMMARY

I am a Full-Stack Web Developer with experience in building scalable and responsive web applications. I focus on creating clean, user-friendly, and modern solutions that provide real value. Alongside web development, I am also working on **AI-driven** projects and exploring new and useful technologies. I enjoy continuous learning and aim to grow further by collaborating with experienced developers and staying updated with industry trends. I am passionate about problem-solving and love tackling real-world technical challenges.

EDUCATION

BS Computer Engineering

Comsats University Lahore

09/2020 - 07/2024 Lahore, Pakistan

- Learned software development by doing projects, solving problems, and working with teams. Gained practical knowledge that improved my technical skills in real work.
- Always eager to learn new technologies and improve by working with my team members.

EXPERIENCE

Full-Stack Developer (MERN)

Axis-Coding Solutions (Present)

- Gaining hands-on experience with modern technologies while collaborating with the team to enhance problem-solving, development, and project management skills.
- Continuously learning and working with new technologies to enhance my skills, gain practical experience, and further improve as a full-stack developer.

Full-Stack Development Internship

Devsinc

- I worked on building responsive and interactive web interfaces during my internship. I completed different projects where I used Ruby on Rails and the MVC framework to handle real development tasks.

Web Development Internship

CodexCue

- Completed an internship in React Js, working on assigned projects and tasks while building responsive and user-friendly web applications. Gained practical experience in React.js for frontend development and learned how to manage real development work in a professional setup.

SKILLS

Javascript	React.js	Express.js	
Node.js	MongoDB	Tailwind CSS	
RTK & Zustand	TanStack	Next.js	
Socket.io	MVC	TypeScript	Git
Github	GenAi & OpenAi Integration		
OAuth2.0 & Google Cloud & AWS		Rest API	

FEATURED PROJECTS

Dubai Wheels

Developed an intuitive MERN Stack marketplace platform for buying and selling new and used vehicles in Dubai, featuring robust authentication system, seamless dealer-user interaction, dynamic vehicle listings, advanced filtering options, real-time notifications, and integrated payment solutions for complete transaction management.

AI-Agent-Calling

Building an AI calling system where each business has its own agent to handle calls and take orders automatically. Integrated ElevenLabs API for natural voice and added tools to manage campaigns and leads.

Liftsol

Developed Lift Sol, a gym enrollment platform where users explore gyms and manage memberships with dedicated Gym Owner and Admin dashboards.

Zino Gaming Platform

Developed a gaming platform using MERN Stack where players participate in various game modes with administrator-created content, supported by role-based dashboards, real-time scoring systems, and competitive leaderboards.

AI Chatbot Development

I created an AI-powered chatbot using OpenAI models integrated with LangChain to enable intelligent and context-driven conversations. The chatbot was designed to handle queries smoothly and provide accurate responses. This project demonstrates my skills in applying modern AI tools to build practical and user-friendly solutions.

Library-Mangement-System

Developed a Library Management System using MERN stack and Tailwind CSS, enhancing my skills in full-stack development, database management, and modern UI design.
