I thrive on exploring cutting-edge tech stacks and driving impactful community initiatives. As a dedicated leader and collaborator, I excel in fostering connections and advancing collective growth through tech-driven solutions.

Experience

AnchorBlock Technology

Mar 2025 - Present

Jr. Fullstack Developer

Dhaka, BD

<https://anchorblock.vc/>

- Verizen (eKYC Solution):** Developed an end-to-end electronic Know Your Customer (eKYC) platform with a Python FastAPI backend, Java (Spring Boot) service powered by SourceAFIS for fingerprint scanning, a shadcn-based frontend, and PostgreSQL database. Enabled users to upload documents, select fingerprint areas, and verify identities against Bangladesh's Election Commission (EC) National ID API.
- AnchorBooks (AI Bookkeeping Platform - anchorbooks.ai):** Led the implementation of Model Context Protocol (MCP) features, conducted UX research and user journey mapping for AI Agentic integration, fully documented the NestJS backend with Swagger UI, integrated JWT and API Gateway, built a React Point-of-Sale system, and developed a local MCP server with Python-generated tools enabling direct integration with Claude, Co-Pilot, and other chat agents.
- Patron (Monitoring Software for a Leading Mobile Financial Service Provider):** Maintained production monitoring systems, managed MinIO, Redis, Postgres, and Docker registries, analyzed InfluxDB for anomaly detection in financial operations, troubleshooted SIM issues (Quectel EC25), and supported App & USSD monitoring pipelines to ensure reliability in large-scale financial operations.

WeGro Global

Feb 2024 - Feb 2025

Junior Backend Developer

Remote
