usamawahid571@gmail.com 

## Summary

A dedicated Software Developer with 1.5 years of experience in building, maintaining, and optimizing web applications and Chrome extensions using JavaScript and React.js. Demonstrated success in enhancing application performance and reliability by writing clean, efficient code, debugging complex issues, and collaborating closely with cross-functional teams in Agile environments. Experienced in the full software development lifecycle, from requirement analysis to deployment, with a strong focus on problem-solving, code quality, and continuous improvement. Known for meticulous attention to detail and a commitment to delivering scalable, maintainable solutions across various platforms.

## Work Experience

### Software Developer

Feb 2024 - March 2025

#### Fusion Systems and Seivices

Developed a Chrome extension from scratch using javascript specifically for Salesforce that generates relative XPath expressions when a user clicks on an HTML element. It also allows users to select any area on a Salesforce page, automatically creating a page object for the selected section. This tool streamlines the process of automation testing by providing accurate, reusable XPaths that can be directly utilized in test scripts. The extension was built with a focus on cross-platform compatibility, ensuring that the generated XPaths work consistently across different Salesforce orgs. Integrated AJAX commands to communicate with APIs for real-time data handling and updates. Utilized Bootstrap for creating a responsive and user-friendly frontend interface, enhancing overall usability and accessibility for testers and developers alike.

### Junior Frontend Developer

May 2023 - Dec 2023

#### Aims Solution, Multan

As a Frontend Developer, I have built responsive and interactive user interfaces using HTML, CSS, JavaScript, and React.js. I've transformed design mockups into fully functional web pages, ensuring cross-browser compatibility and optimized performance. I've worked on integrating APIs, handling dynamic data, and creating reusable components to improve development efficiency. I was focused on writing clean, maintainable code and had experience collaborating with teams in Agile environments to deliver features on time. My goal was to create seamless user experiences while continuously learning and growing in the field of frontend development.

## Education

### Bachelors of Science in Computer Science

2019 - 2023

#### Virtual University Of Paksitan, Lahore

Graduated with a CGPA of **3.23** Throughout the program, consistently demonstrated strong performance in software development, testing, and quality assurance methodologies, achieving top marks in key courses and contributing to several academic projects.

# Technical Skills

## Tools & Technologies

- SQL Server Management Studio, MySQL Workbench
- Postman, Visual Studio Code, XAMPP, Google Firebase

## Programming Languages & Frameworks

- Java, JavaScript, Bash, SQL
- React js, Node.js, HTML, CSS

## Version Control & Collaboration

- GitHub for version control and collaboration
- Agile methodologies, including participation in daily standups and sprint planning

# Soft Skills

Communication

Attention to Detail

Problem-Solving

Time Management

Critical thinking

Collaboration
