Experience

ImagineTech Solutions

Software Engineer (.NET Core)

Gilgit Baltistan, Pakistan

August, 2025–Present

- Designed and developed RESTful APIs using ASP.NET Core and Dapper for enterprise applications.
- Implemented JWT-based authentication and authorization for secure web apps.
- Optimized SQL queries and improved performance of high-traffic applications.
- Collaborated with frontend teams to integrate APIs with Angular and React apps.

OrderKar.com

Frontend Developer

Sukkur, Pakistan

2020–2022

- Developed responsive user interfaces using **HTML5, CSS3, JavaScript, and Bootstrap**.
- Implemented dynamic components and interactive features with **React.js**.
- Collaborated with backend team to integrate REST APIs into the frontend.
- Optimized web performance and ensured cross-browser compatibility.
- Worked in an Agile team environment using Jira and GitHub for project management and version control.

Education

Sukkur IBA University

Bachelor of Science in Computer Science

Sukkur, Pakistan

2019–2024

Projects

API for GameStore App: Designed and implemented RESTful APIs for a game store application using **ASP.NET Core** and **Entity Framework Core**. Secured endpoints with **JWT authentication** and added role-based access control.

Frontend for OrderKar: Developed a responsive and scalable **e-commerce frontend** using **React.js, Bootstrap**, and **Redux**. Integrated REST APIs for product listings, cart, and checkout while ensuring mobile-first design and cross-browser compatibility.

Languages

English (Fluent), Urdu (Native)
