Professional Summary

Cloud-oriented Software Engineer with **2+ years'** experience building scalable, high-performance web applications using **React, Angular, and Node.js**. Skilled in serverless platforms (**Vercel**, **Firebase**), **Docker**, and **CI/CD automation** (GitHub Actions). Adept at bridging **UI/UX** design with engineering, mentoring juniors, and collaborating with international teams to deliver production-grade solutions for EU clients.

Technical Skills

Frontend: React, Angular, JavaScript (ES6+), TypeScript, Next.js, Redux, Ionic, Tailwind CSS, Bootstrap

Backend: PHP, Laravel, Node.js, Express.js, REST APIs

Cloud & DevOps: Docker, GitHub Actions, Git, Firebase, Vercel

Databases: MySQL, PostgreSQL, MongoDB

UI/UX & Tools: Figma, Adobe XD, Photoshop, Agile/Scrum, Slack

Professional Experience

Software Engineer — BayLanka Technologies, Colombo, Sri Lanka

Sep 2023 – Present

- Led the frontend development of multiple production applications using React and Angular, ensuring pixel-perfect UI and responsive design across devices.
- Owned and delivered key modules in the Customer Ticket Management System (LevelUP – Signal Iduna, Germany), including the Email module and the entire frontend UI; currently collaborating with a senior engineer on the Car Insurance module.
- Integrated REST APIs with frontend apps to improve data flow and feature delivery.
- Configured GitHub Actions pipelines to deploy new features to development, staging, and production environments.
- Improved performance through lazy loading, code splitting, and efficient state management — achieving up to 80% faster load times.
- Participated in architectural planning and mentored junior developers on best practices in cloud deployment and component-driven design.
- Delivered sprint-ready solutions through direct client collaboration and agile planning with EU teams.

Selected Projects

Customer Ticket Management System (LevelUP – Signal Iduna, Germany)

PHP, MySQL, GitHub Actions — Developed a secure ticketing platform with encrypted document handling and digital signatures. Led Email module and frontend architecture; automated deployments across dev/stage/prod.

Personal Portfolio App (Venture Card)

React.js, Redux, Angular, Ionic, PHP, Figma — Built a customizable portfolio platform with an admin panel to showcase premium business packages and contacts.

Property Management System (Woblu – Germany)

Angular, Ionic, PHP, Figma — Implemented core frontend modules and API integration to streamline incident reporting and task management.

Education & Certifications

BSc (Hons) Software Engineering — Cardiff Metropolitan University (2022 – 2025)

Google UX Design Professional Certificate — In Progress
