SUMMARY OF QUALIFICATIONS

Full-Stack Developer skilled in **JavaScript**, **React.js**, **Next.js**, **Node.js**, **Express.js**, and **MongoDB**. Experienced in designing, building, and deploying end-to-end web applications with responsive UIs, scalable backends, robust API integrations, and efficient database management. Proven ability to deliver seamless user experiences using custom components and third-party libraries.

Tools & Technologies:

- **UI Frameworks & Libraries**: React.js, Next.js, Material-UI (MUI),ChakraUI, Bootstrap, Tailwind CSS, shadcn/ui
- **JavaScript Libraries & Extensions**: zustand, redux-toolkit, Redux Thunk, RTK-Query, React-hook-form, Formik, Framer-Motion, Zod, Yup, Axios, React Router Dom, Git
- **Node.js Frameworks & Libraries**: Express.js, Mongoose ODM
- **Database Systems**: MongoDB, MySQL , PostgreSQL
- **API Tools & Services**: REST APIs, Postman, RESTful APIs
- **Code Hosting Platforms**: GitHub, Vercel, Netlify

Education:

Bachelors in Software Engineering
Virtual University of Pakistan
(2022 - present)
Pakistan

Associate Degree in Science
Superior Group of Colleges
(2020 - 2022)
Sargodha, Pakistan

Freelancer - MERN Stack Developer   Mar 2023 - Dec 2024

I worked asaFrontend DeveloperInternat ZeikhTechnologies,where I enhanced my hands-on experiencein frontend development. I created responsive web interfaces using HTML, CSS, JavaScript, React.js, and Next.js, and collaborated with the team to seamlessly integrate design and functionality. I focused on ensuring optimal performance and delivering a smooth user experience across various devices

Zeikh Technologies - Frontend Developer   Dec 2024 - Aug 2025

I'm currently working as a Frontend Developer at ZeikhTechnologies, enhancing my hands-on experience in frontend development. I create responsive web interfaces using HTML, CSS, JavaScript, React.js, and Next.js, managing data flow effectively while collaborating with the team to seamlessly integrate design, functionality and ensure optimal performance and a smooth user experience.

Project: pack And Track - UAE

I worked as a Frontend Developer on a Courier Management web application, where vendors could create and manage shipments, sending them from one location to another. I built the user interface using Next.js, Tailwind CSS, ShadCN, and Magic UI, ensuring a responsive design, smooth user experience, and real-time shipment tracking. My role involved integrating APIs to display dynamic data and optimizing the UI for efficiency and usability.

Project URL: packandtrack

Project: Stayinn Hostels - Pakistan

I'm working on StayInn Hostels, a web platform for booking hostel rooms, where I handle both frontend and backend development using the MERN stack. The frontend is almost complete, and I am currently focused on building the backend and creating APIs with Node.js, Express.js, and MongoDB. The platform allows users to search for rooms, make bookings, and manage reservations. I ensure smooth functionality, optimize performance, and integrate secure payment options while managing the entire development process.

Project URL: StayinnHostels

Project: Noshly - America

I Worked on the development of Noshly's dashboard and frontend, focusing on designing and implementing responsive, scalable, and user-friendly interfaces. As a Frontend Developer, I collaborated closely with the team to enhance functionality, optimize performance, and improve overall usability, ensuring a seamless and engaging user experience across different devices and browsers.

Project URL: Noshly

Project: Shopvessels - UK

Developed ShopVessels, a Learning Management System (LMS) designed to deliver a smooth and interactive learning experience. Implemented core features including user authentication, course management, content delivery, and progress tracking. Focused on building a responsive frontend with React and Tailwind CSS, while ensuring scalability, performance optimization, and seamless integration with backend APIs for efficient data handling.

Project URL: Shopvessels

Project: Zask Tools - self

I'm developing a Tools Website, a web application that offers various utilities such as PDF tools, image tools, and video tools. As a MERN Stack Developer, I built the platform using Next.js, Tailwind CSS, ShadCN, Express.js, and MongoDB, ensuring a seamless and efficient user experience. The website is designed to be fast, responsive, and user-friendly, allowing users to perform tasks effortlessly. I also integrated APIs to enhance functionality and optimize real-time processing.
