Web Developer   *Lahore, Pakistan*
Freelance Frontend Developer Jul 2023 - May 2024
- Delivered responsive and user-friendly websites and web applications that met client expectations and enhanced user engagement.
- Utilized HTML, CSS, JavaScript, and React to build custom web solutions, improving performance and client satisfaction.
- Integrated RESTful APIs for seamless data exchange between front-end and back-end systems, ensuring efficient functionality.

EDUCATION

Punjab University College of Information Technology, Lahore   **2019 - 2023**
B.S, Information Technology
- **GPA:** 2.9

PROJECTS

Store Admin Dashboard | https://github.com/muneeb787/store-admin-dashboard
- Engineered a comprehensive e-commerce administration dashboard using React to provide a dynamic and intuitive interface for managing all store operations.
- Implemented core e-commerce functionalities, including a secure shopping cart system and a dynamic product category management feature for streamlined inventory.
- Created a complete order processing and tracking system, allowing for real-time monitoring and updates of customer orders from placement to fulfillment.
- Integrated a payment gateway to securely handle and process online payments, ensuring a seamless and reliable checkout experience for customers.
- Demonstrated end-to-end full-stack development by building both the frontend dashboard and the backend API, showcasing a deep understanding of a complete e-commerce solution.

Final Year Project - Ecommerce App | https://github.com/NumanBytes/Project-code
- Developed robust and efficient backend APIs utilizing Django framework to handle various aspects of the e-commerce platform, including product management, user authentication, and order processing.
- Collaborated closely with the frontend development team to ensure smooth integration and interaction between frontend components and the backend API.
